*Compared with current
solutions!*

**Reduce your costs & increase your
productivity with a
Business VoIP Phone System Solution**

Highly Flexible Solution:

- Each System can be tailored to your business needs.
- Making system changes like adding a handset, changing system programming or adding features are quick to implement.

Better Customer Service & Productivity:

- Since IP systems are computer-based, you can integrate phone functions with business applications
- Customers calling in can be self-served via auto-attendant or directed to selected handsets depending on time of day or other options

Eliminate Vendor Lock:

- VoIP systems are based on open standards that allow you to mix and match hardware or softphones.

Rich Feature Set:

- Over 20+ features included at no additional licensing cost
- These Base features are often very expensive in proprietary systems.

Significant Cost Savings:

- Using the internet to make calls will reduce your monthly long distance phone bill.
- Reducing the number of analog lines will also reduce costs.

Easily Scales Up:

- VoIP Systems allows you to add phones and numbers as your business grows without upgrading the core system.
